Skills

- Agile Software Development/Engineering
- Project management
- RF circuit design
- Automation robotics
- Firmware development
- Experimental analysis
- Rust Language
- Python Language
- TypeScript
- Mentoring
- Cloud Computing
- SQL
- AI Development
- Git

Education And Training

05/2012

Master of Science:

Physical Chemistry

University of Virginia

Charlottesville, VA

05/2007

Bachelor of Science:

Chemistry

University of Virginia

Charlottesville, VA

Matthew Muckle - Sr Developer

Summary

Results-oriented developer and project manager with over a decade of experience in software development and scientific research. Proven track record in developing automation solutions and managing complex projects, contributing to innovative advancements in laboratory instrumentation. Agile approach to development with a focus on solving problems.

Experience

BrightSpec Inc - Sr. Software Dev, Scientist, Founder

Charlottesville, Virginia

03/2012 - 01/2026

- Used Rust (2021-Now), Python(2012-Now) and Typescript(2021-Now) for desktop and cloud based development
- Large data analysis development and data management through SQL
- Wrote and Managed SBIR grants
- Developed software to control advanced laboratory instrumentation
- Designed and integrated automation software.
- Designed and integrated RF circuits.
- Built automation robotics for chemical sample analysis.
- Firmware design an implementation for microcontrollers (Rust and C/C++).
- Project management in Jira for internal and externally contracted assignments.
- Customer sales through trade shows and site visits.
- AI assisted development (Claude/Codex)
- AI development for analysis of complex molecular spectra

University of Virginia - Graduate Researcher

Charlottesville, Virginia

06/2007 - 05/2012

- Developed and constructed rotational spectrometers, research in astrochemistry, wrote instrument control and big data analysis software
- Presented research at multiple international conferences
- Collaborated on cross-university research projects

Activities

Magic the Gathering: Level 3 Judge, 3d printing, pottery, Laser cutting
